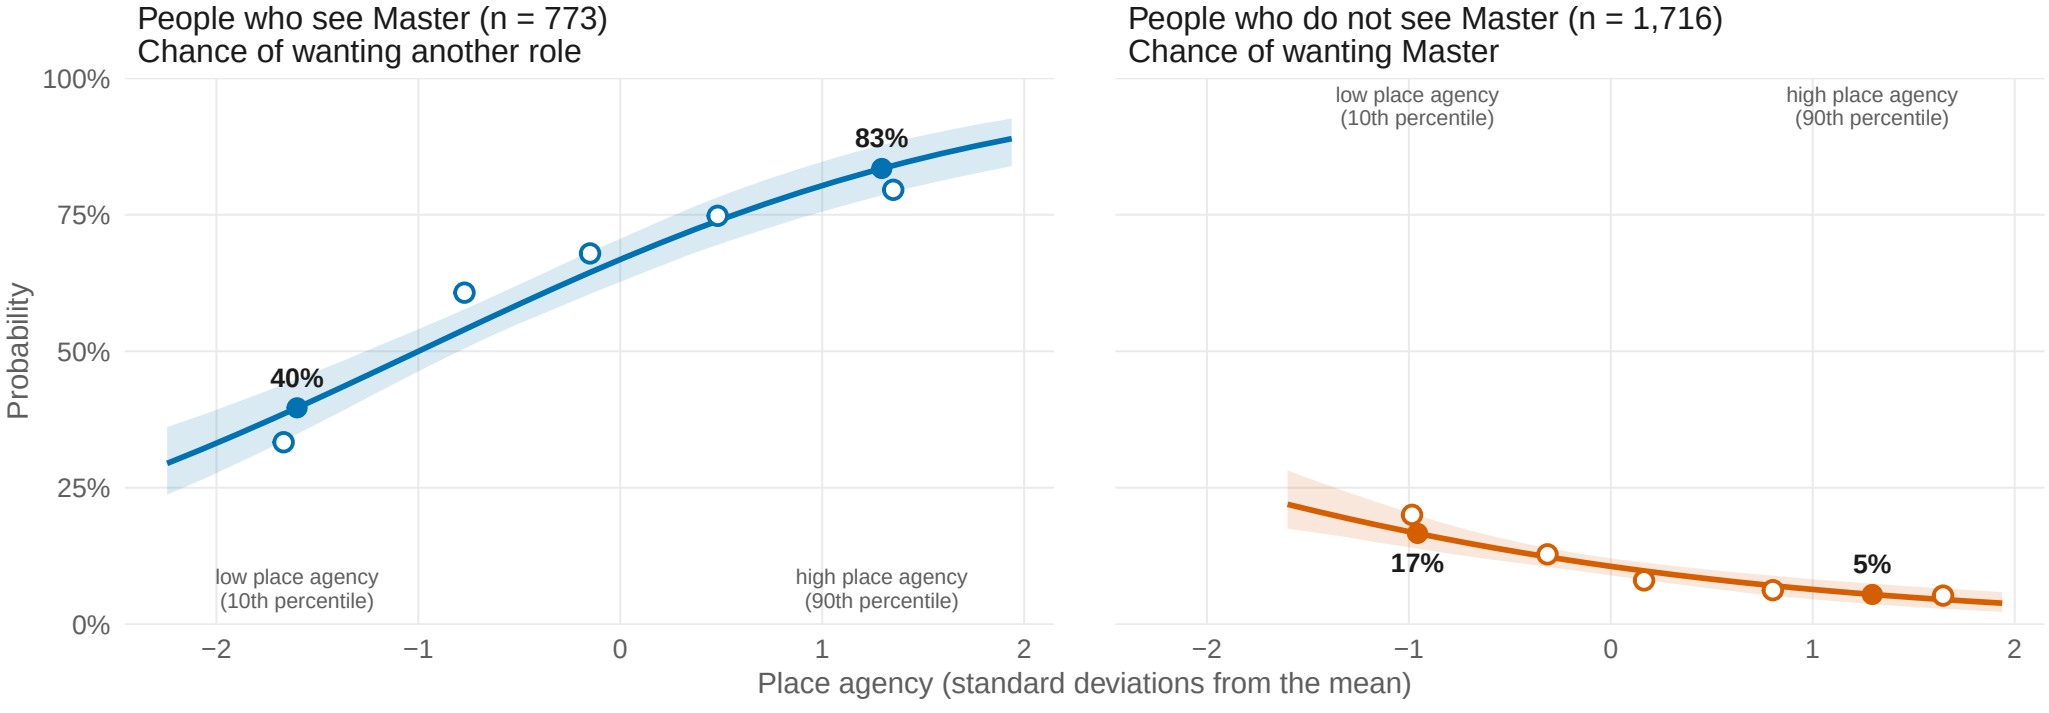
Place agency separates the people who reject the mastery they see from those who keep it

Average predicted probability across place agency, with the motives, societal control, age, gender, education and country as observed



Line and band: model prediction with a 95% bootstrap interval. Open dots: observed shares in fifths of place agency.
Filled dots: the 10th and 90th percentiles of place agency in each group. Source: 32_who_rejects_mastery.R
